On Dreams (1901)

"During the epoch which may be described as pre-scientific, men had no difficulty in finding an explanation of dreams. When they remembered a dream after waking up, they regarded it as either a favourable or a hostile manifestation by higher powers, daemonic and divine. When modes of thought belonging to natural science began to flourish, all this ingenious mythology was transformed into psychology, and to-day only a small minority of educated people doubt that dreams are a product of the dreamer's own mind. Since the rejection of the mythological hypothesis, however, dreams have stood in need of explanation. In this book, Freud attempts to do it"

The Psychopathology of Everyday Life (1901)

Considered one of the major texts that outlines Freud's psychoanalytic theory. The book takes a closer look at a number of deviations that occur during everyday life, including forgetting names, slips of the tongue (aka Freudian slips) and errors in speech and concealed memories. He then analyzes the underlying psychopathology that he believed led to such errors.

Three Essays on the Theory of Sexuality (1905)
