"Finance Made Easy Series has been designed to cater to managers and executives with little understanding of finance and little time to read treatises on financial management. Hence, the series seeks to demystify apparently complex financial statements and help create a finance-savvy executive class, the key to fiscally sound and successful businesses. A lucid, creative and concise exposition of financial statements, their components, jargon and computational methods along with short stories and numerical examples makes for an engaging read for busy professionals. How to Read a Cash Flow Statement focuses on Cash Flow Statement, that enables a company to gauge cash position and manage daily functions more efficiently. The book covers: • Funds and Working Capital. • Capital Invested and Factors Affecting Fund Requirements. • Fund Flow and Cash Flow Statement. • Solved Illustrations and Exercises with answer keys. Using simple language and short stories to set the stage and tone for theoretical discussions, it helps non-finance executives make sense of jargon-laden cash flow statements of their firms and competing ones."
