Novum Organum

Mr Lord Bacon

Novum Organum Mr Lord Bacon

Book one consists of Bacon's scathing attack on current philosophy and on the scientific method. He attacks the syllogistic method, and the various idols that prevent men from investigating Nature in a reasonable way. The lack of attention paid to natural philosophy and the excessive reverence for ancient authors are key reasons why man's knowledge of nature has progressed so slowly. Book Two is a detailed explanation of Bacon's method, using various examples. It begins by creating tables of the various instances that meet in the nature to be investigated. After the relevant instances have been presented to the intellect, the task of induction can be carried out. Induction acts by excluding various possibilities, until an affirmative has been achieved. The next stage is the consideration of privileged instances, which assist the process in terms of information or of practice.
