Ecological Awareness: Exploring Religion, Ethics and Aesthetics (Studies in Religion and the Environment / Studien zur Religion und Umwelt)

The past years have seen an ecological development in religions that is staggering. These efforts are responses to difficult local and global ecological problems, with an increased awareness that religions need to be alert, engaged and active partners in the work for a sustainable future. Ecological Awareness - with 17 authors from theology, religious studies, biology, sociology and philosophy - explores how religious practitioners have become increasingly aware of ecological challenges. The book considers aspects of ecological awareness: personal, social, political, religious and ecological. It sheds new light on an essential function of belief systems, which function not only as cognitive and moral systems, but emerge from and affect our human body and its mode of perceiving our milieu and ourselves within it. The book contributes to an increasing awareness of our embeddedness in larger life processes, as well as the awareness of life as a gift.
