Food Allergy in Children, An Issue of Pediatric Clinics, 1e (The Clinics: Internal Medicine) Hemant Sharma MD, Robert Wood MD, Max J. Coppes MD PhD MBA

Dr. Coppes and his co-Editors have created a comprehensive table of contents that addresses the full spectrum of food allergies in children. Articles are presented to be most useful to pediatricians, as the issue begins with the clinical presentation and epidemiology of food allergy, and then progresses to the diagnostic testing and pathophysiology. Articles are also included that are devoted to specific types of food allergy, dairy, soy, egg, peanut, and tree nut. Finally, articles are also devoted to living with allergies, management of allergies in schools and camps, and therapies for food allergies.
