Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Metabolomics enables valuable information about the biochemical composition of foods to be rapidly obtained. Since the biochemical profile of food largely determines key food properties such as flavour and shelf life, the information gained using metabolomics-based methods will enable greater control of food quality and also help to determine the relationship between diet and health. Metabolomics in food and nutrition provides an overview of their current and potential use in the food industry.

Part one reviews equipment, methods and data interpretation in metabolomics including the use of nuclear magnetic resonance (NMR), statistical methods in metabolomics, and metabolic reconstruction databases and their application to metabolomics research. Part two explores applications of metabolomics in humans, plants and food. Chapters discuss metabolomics in nutrition, human samples for health assessments, and current methods for the analysis of human milk oligosaccharides (HMOs) and their novel applications. Further chapters highlight metabolomic analysis of plants and crops, metabolomics for the safety assessment of genetically modified (GM) crops, and applications of metabolomics in food science including food composition and quality, sensory and nutritional attributes.

With its distinguished editors and team of expert contributors, Metabolomics in food and nutrition is a technical resource for industrial researchers in the food and nutrition sectors interested in the potential of metabolomics methods and academics and postgraduate students working in the area.

- Provides an overview of the current and potential future use of metabolomics in the food industry
- Chapters focus on key applications and review the analytical methods used and the bioinformatics techniques involved in processing the results
- Discusses metabolomics in nutrition, human samples for health assessments, and current methods for the analysis of human milk oligosaccharides (HMOs) and their novel applications

From reader reviews:

Belinda Timmer:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite reserve and reading a guide. Beside you can solve your short lived problem; you can add your knowledge by the reserve entitled Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition). Try to face the book Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) as your good friend. It means that it can to be your friend when you really feel alone and beside that of course make you smarter than previously. Yeah, it is very fortuned to suit your needs. The book makes you a lot more confidence because you can know almost everything by the book. So , let us make new experience as well as knowledge with this book.

Daniel Reynolds:

The book Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) give you a sense of feeling enjoy for your spare time. You need to use to make your capable far more increase. Book can to be your best friend when you getting tension or having big problem with your subject. If you can make reading a book Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) for being your habit, you can get more advantages, like add your own capable, increase your knowledge about many or all subjects. You are able to know everything if you like wide open and read a reserve Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition). Kinds of book are a lot of. It means that, science e-book or encyclopedia or others. So, how do you think about this guide?

Robert Spann:

The book Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) can give more knowledge and information about everything you want. So just why must we leave the good thing like a book Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition)? Several of you have a different opinion about guide. But one aim that will book can give many information for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or info that you take for that, you could give for each other; you could share all of these. Book Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition) has simple shape however, you know: it has great and massive function for you. You can appear the enormous world by wide open and read a book. So it is very wonderful.

Kathleen Sinclair:

What is your hobby? Have you heard that question when you got learners? We believe that that concern was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And you know

that little person such as reading or as examining become their hobby. You must know that reading is very important in addition to book as to be the factor. Book is important thing to add you knowledge, except your personal teacher or lecturer. You see good news or update about something by book. Numerous books that can you take to be your object. One of them is actually Metabolomics in Food and Nutrition (Woodhead Publishing Series in Food Science, Technology and Nutrition).
