The New Earth from Above: 365 Days: Revised Edition Yann Arthus-Bertrand

The New Earth From Above: 365 Days is now fully revised and updated. Reaching across the continents, from the icebergs of Antarctica to the cotton fields of India, the breathtaking, full-color photographs are accompanied by informative new text that describes the environmental concerns related to each location. Each chapter of the book opens with an insightful introduction by a different noted author who addresses a subject critical to the future of our planet: agriculture, biodiversity, sustainable development, energy, forests, water, and global warming.

This edition includes 60 new and unpublished photos taken by Arthus-Bertrand over the past few years. The text throughout the book is revised to reflect changes in the world since the last publication, and includes three new authors: the heads of WWF France and the Observatory of Renewable Resources, and the president of Alter Eco, a fair trade firm.

Yann Arthus-Bertrand's powerful aerial photographs reveal the incidental beauty of our planet and are reminders of our capacity to save or destroy it.
