An Ice Age Caused by the Genesis Flood Michael Oard

Although a major mystery of uniformitarian history, the Ice Age is readily explained by the climatic consequences of the Genesis Flood-it was a short Ice Age of about 700 years, and there was only one Ice Age. We do not need the hundred thousand years for one ice age, or the few million years for multiple ice ages, as claimed by uniformitarian scientists. Even their claim of ancient ice ages in the hard rocks can be accounted for by gigantic submarine landslides during the Flood. The post-Flood rapid Ice Age can also account for a number of major mysteries and other interesting phenomena that occurred during the Ice Age, such as the Lake Missoula flood and the life and death of the woolly mammoths in Siberia and elsewhere. When we stick to the Genesis account of the Flood and the short scriptural timescale, major secular/uniformitarian mysteries are readily explained.
