Text Mining: From Ontology Learning to Automated Text Processing Applications (Theory and Applications of Natural Language Processing)

Text Mining: From Ontology Learning to Automated Text Processing Applications (Theory and Applications of Natural Language Processing)

This book comprises a set of articles that specify the methodology of text mining, describe the creation of lexical resources in the framework of text mining and use text mining for various tasks in natural language processing (NLP). The analysis of large amounts of textual data is a prerequisite to build lexical resources such as dictionaries and ontologies and also has direct applications in automated text processing in fields such as history, healthcare and mobile applications, just to name a few. This volume gives an update in terms of the recent gains in text mining methods and reflects the most recent achievements with respect to the automatic build-up of large lexical resources. It addresses researchers that already perform text mining, and those who want to enrich their battery of methods. Selected articles can be used to support graduate-level teaching.

The book is suitable for all readers that completed undergraduate studies of computational linguistics, quantitative linguistics, computer science and computational humanities. It assumes basic knowledge of computer science and corpus processing as well as of statistics.

From reader reviews:

Kerry Diaz:

What do you consider book? It is just for students because they're still students or this for all people in the world, the actual best subject for that? Merely you can be answered for that problem above. Every person has distinct personality and hobby for every single other. Don't to be obligated someone or something that they don't desire do that. You must know how great along with important the book Text Mining: From Ontology Learning to Automated Text Processing Applications (Theory and Applications of Natural Language Processing). All type of book can you see on many solutions. You can look for the internet options or other social media.

Irving Hansen:

This book untitled Text Mining: From Ontology Learning to Automated Text Processing Applications (Theory and Applications of Natural Language Processing) to be one of several books that will best seller in this year, that is because when you read this book you can get a lot of benefit in it. You will easily to buy this kind of book in the book store or you can order it by means of online. The publisher on this book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smart phone. So there is no reason to your account to past this book from your list.

Dan Villanueva:

The book untitled Text Mining: From Ontology Learning to Automated Text Processing Applications (Theory and Applications of Natural Language Processing) is the reserve that recommended to you to study. You can see the quality of the reserve content that will be shown to an individual. The language that creator use to explained their way of doing something is easily to understand. The author was did a lot of analysis when write the book, therefore the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Text Mining: From Ontology Learning to Automated Text Processing Applications (Theory and Applications of Natural Language Processing) from the publisher to make you far more enjoy free time.

Johnnie Colby:

Precisely why? Because this Text Mining: From Ontology Learning to Automated Text Processing Applications (Theory and Applications of Natural Language Processing) is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will shock you with the secret that inside. Reading this book beside it was fantastic author who else write the book in such remarkable way makes the content inside of easier to understand, entertaining way but still convey the meaning fully. So , it is good for you because of not hesitating having this nowadays or you going to regret it. This book will give you a lot of gains than the other book include such as help improving your proficiency and your critical thinking approach. So , still want to hold up having that book? If I were you I will go to the book store hurriedly.
