## **An Introduction to Statistical Modeling of Extreme Values** Stuart Coles

Directly oriented towards real practical application, this book develops both the basic theoretical framework of extreme value models and the statistical inferential techniques for using these models in practice. Intended for statisticians and non-statisticians alike, the theoretical treatment is elementary, with heuristics often replacing detailed mathematical proof. Most aspects of extreme modeling techniques are covered, including historical techniques (still widely used) and contemporary techniques based on point process models. A wide range of worked examples, using genuine datasets, illustrate the various modeling procedures and a concluding chapter provides a brief introduction to a number of more advanced topics, including Bayesian inference and spatial extremes. All the computations are carried out using S-PLUS, and the corresponding datasets and functions are available via the Internet for readers to recreate examples for themselves. An essential reference for students and researchers in statistics and disciplines such as engineering, finance and environmental science, this book will also appeal to practitioners looking for practical help in solving real problems. Stuart Coles is Reader in Statistics at the University of Bristol, UK, having previously lectured at the universities of Nottingham and Lancaster. In 1992 he was the first recipient of the Royal Statistical Society's research prize. He has published widely in the statistical literature, principally in the area of extreme value modeling.

### **From reader reviews:**

#### **William Fugate:**

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite publication and reading a e-book. Beside you can solve your trouble; you can add your knowledge by the book entitled An Introduction to Statistical Modeling of Extreme Values. Try to stumble through book An Introduction to Statistical Modeling of Extreme Values as your good friend. It means that it can to be your friend when you truly feel alone and beside that course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you far more confidence because you can know anything by the book. So , let us make new experience and knowledge with this book.

#### **Melvin Belknap:**

Nowadays reading books be than want or need but also turn into a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The data you get based on what kind of publication you read, if you want send more knowledge just go with education and learning books but if you want really feel happy read one with theme for entertaining including comic or novel. Often the An Introduction to Statistical Modeling of Extreme Values is kind of guide which is giving the reader unpredictable experience.

#### **Mary McClellan:**

The e-book untitled An Introduction to Statistical Modeling of Extreme Values is the e-book that recommended to you to read. You can see the quality of the e-book content that will be shown to you actually. The language that writer use to explained their way of doing something is easily to understand. The article author was did a lot of investigation when write the book, and so the information that they share for your requirements is absolutely accurate. You also could possibly get the e-book of An Introduction to Statistical Modeling of Extreme Values from the publisher to make you far more enjoy free time.

#### **James Holmes:**

Don't be worry when you are afraid that this book may filled the space in your house, you can have it in e-book means, more simple and reachable. This specific An Introduction to Statistical Modeling of Extreme Values can give you a lot of friends because by you taking a look at this one book you have issue that they don't and make you more like an interesting person. This book can be one of one step for you to get success. This reserve offer you information that might be your friend doesn't realize, by knowing more than other make you to be great men and women. So , why hesitate? We need to have An Introduction to Statistical Modeling of Extreme Values.
