The second edition of *Human Communication* is an engaging reflection of the contemporary field of communication studies. The authors' writing mantra ("Make It Smart; Keep It Real") leads to a text that strikes a practical balance of definitive content and everyday application. To "make it smart," the authors read hundreds of articles from such mainstream communication journals as *Communication Education*, *Communication Monographs*, and *Communication Studies*. To "keep it real," the authors synthesized their findings so that they resonate with the challenges and goals of today's typical basic course. Every chapter features skill-building, critical thinking, innovative pedagogy, 21st century examples, and lively writing that is respectful of the student reader.

Human Communication, Second Edition, is also a complete learning package that integrates the text and a variety of media components, including a companion Online Learning Center, a student CD-ROM, and an extensive collection of original videos series.
