Raspberry Pi Super Cluster

Andrew K. Dennis

Raspberry Pi Super Cluster Andrew K. Dennis

As a Raspberry Pi enthusiast have you ever considered increasing their performance with parallel computing? Discover just how easy it can be with the right help - this guide takes you through the process from start to finish.

Overview

- Learn about parallel computing by building your own system using Raspberry Pi
- Build a two-node parallel computing cluster
- Integrate Raspberry Pi with Hadoop to build your own super cluster

In Detail

A cluster is a type of parallel/distributed processing system which consists of a collection of interconnected stand-alone computers cooperatively working together. Using Raspberry Pi computers, you can build a two-node parallel computing cluster which enhances performance and availability.

This practical, example-oriented guide will teach you how to set up the hardware and operating systems of multiple Raspberry Pi computers to create your own cluster. It will then navigate you through how to install the necessary software to write your own programs such as Hadoop and MPICH before moving on to cover topics such as MapReduce. Throughout this book, you will explore the technology with the help of practical examples and tutorials to help you learn quickly and efficiently.

Starting from a pile of hardware, with this book, you will be guided through exciting tutorials that will help you turn your hardware into your own super-computing cluster. You'll start out by learning how to set up your Raspberry Pi cluster's hardware. Following this, you will be taken through how to install the operating system, and you will also be given a taste of what parallel computing is about. With your Raspberry Pi cluster successfully set up, you will then install software such as MPI and Hadoop. Having reviewed some examples and written some programs that explore these two technologies, you will then wrap up with some fun ancillary projects. Finally, you will be provided with useful links to help take your projects to the next step.

What you will learn from this book

- Discover how to set up the hardware to build your parallel computing cluster
- Set up your Raspberry Pi computers and install an operating system
- Network your two Raspberry Pi's together
- Gain an understanding of MPI through practical examples
- Learn how to work with MPICH to write parallel applications
- Install Hadoop and experiment with processing text files
- Get acquainted with MapReduce, the paradigm at the heart of Hadoop

Approach

This book follows a step-by-step, tutorial-based approach which will teach you how to develop your own

super cluster using Raspberry Pi computers quickly and efficiently.

Who this book is written for

Raspberry Pi Super Cluster is an introductory guide for those interested in experimenting with parallel computing at home. Aimed at Raspberry Pi enthusiasts, this book is a primer for getting your first cluster up and running.

Basic knowledge of C or Java would be helpful but no prior knowledge of parallel computing is necessary.

From reader reviews:

Aline Moran:

Within other case, little persons like to read book Raspberry Pi Super Cluster. You can choose the best book if you love reading a book. Provided that we know about how is important a new book Raspberry Pi Super Cluster. You can add know-how and of course you can around the world by just a book. Absolutely right, mainly because from book you can know everything! From your country until eventually foreign or abroad you can be known. About simple matter until wonderful thing it is possible to know that. In this era, we could open a book or even searching by internet product. It is called e-book. You can use it when you feel bored to go to the library. Let's go through.

Roberta Bourland:

Beside this Raspberry Pi Super Cluster in your phone, it can give you a way to get closer to the new knowledge or data. The information and the knowledge you are going to got here is fresh from your oven so don't become worry if you feel like an aged people live in narrow commune. It is good thing to have Raspberry Pi Super Cluster because this book offers for your requirements readable information. Do you often have book but you would not get what it's interesting features of. Oh come on, that won't happen if you have this in the hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. So do you still want to miss that? Find this book as well as read it from currently!

Teresa Brown:

As we know that book is essential thing to add our information for everything. By a publication we can know everything we really wish for. A book is a pair of written, printed, illustrated or maybe blank sheet. Every year seemed to be exactly added. This guide Raspberry Pi Super Cluster was filled in relation to science. Spend your free time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading a book. If you know how big advantage of a book, you can really feel enjoy to read a book. In the modern era like at this point, many ways to get book that you just wanted.

Geneva Orta:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some reserve, they are complained. Just tiny students that has reading's spirit or real their hobby. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this Raspberry Pi Super Cluster can make you really feel more interested to read.
